ABOUT ME

I recently graduated with a Bachelors degree, in Electrical and Electronics Engineering. I'm really passionate about web development. I'm currently looking for opportunities as a Web Developer where I can put my skills in Python, HTML, CSS, JavaScript, Flask, Django and MySQL to use. I have a drive to excel work well in teams and always strive to learn more. I believe my skills and commitment would be an addition, to your organization. Lets connect and discuss how I can contribute to your team.

PROJECTS

2023
JOB PORTAL
I have combined HTML, CSS, JavaScript, Python, Bootstrap and Django to develop a job platform that offers a user friendly interface, for both individuals searching for jobs and employers.

2023
BIOMETRIC MANAGEMENT SYSTEM
Transform the way biometric management works with my system that seamlessly combines HTML, CSS, JavaScript, Python and Flask. This system empowers administrators and employees by providing a user interface that guarantees login and information storage in a MySQL database.

2023
PHOTO BACKGROUND REMOVER
Easily enhance your photos using my background removal tool, which is powered by HTML, CSS, JavaScript, Python and Flask. You'll enjoy an hassle free experience, with storage in a MySQL database and a user friendly design that makes uploading a breeze.
